PRODIGY
PLUS

Nearly a decade after transforming the industry with proven Prodigy® technology, Hydrate HQ is proud to announce the next generation of ice-making technology: Prodigy Plus®. This innovative platform is the all-new foundation for a wide range of modular cube, flake and nugget ice machines — enhancing accessibility, serviceability and functionality like never before.

Easy to service.

With a variety of features and upgrades designed to ensure your unit is always easy to service, technology helps operators save valuable time and resources. Next-generation diagnostic readouts, intuitive external indicator lights and a durable, convenient front panel make the Hydrate Ice 330 platform the perfect choice for high-traffic operations.

AUTOALERT™ INDICATOR LIGHTS

Relocated to the lower left corner of the front panel for enhanced visibility, our innovative LED lights keep you informed about your unit's operating status.

IMPROVED QR CODE PLACEMENT AND ACCESS

Get immediate access to unit-specific technical service and warranty information with our industry-exclusive QR code technology.

SELF-ALIGNING FRONT PANEL

Redesigned for easy removal and simple access to all serviceable components, this robust front panel features screws located easily within reach.

SMART-BOARD™ ADVANCED FEATURE MODULE (optional)

This optional feature provides NAFEM data protocol, as well as additional operational data for early alerts

Inspired by customer feedback and in-depth market research.

Easy to clean.

As an operator, there's nothing more important than the cleanliness and safety of everything you serve your customers. With powerful one-touch capability and a conveniently located air filter, the Prodigy Plus® platform makes reliable, effective cleaning easier than ever.

FRONT-LOCATED AIR FILTER

The reusable air filter on all 22" and 30" air-cooled cuber units has been relocated to the front for added clearance and breathability.

Now all Prodigy Plus® modular cube, flake and nugget ice machines operate at maximum efficiency.

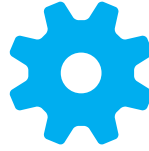

ONE-TOUCH CLEANING

The Hydrate Ice 300 cuber has a streamlined ice head cleaning process that runs with the single push of a button, eliminating the need for service or monitoring by an operator.

BUILT-IN ANTIMICROBIAL PROTECTION

AquaArmor, which utilizes AgION is molded directly into key internal components to protect your machine between cleanings.

Easy to operate.

We designed the Hydrate HQ 330 with the operator in mind. That's why every easy-to-use feature we offer helps you get the most out of your unit. From convenient cleaning and a small operational footprint to enhanced energy efficiency, Hydrate HQ 330 is the smart solution for today's busy foodservice facilities and a wide variety of additional applications.

SMALLER OPERATIONAL FOOTPRINT

Our 22" and 30" cuber units feature a relocated air filter, joining our flake and nugget ice machines in allowing for minimal side clearance that helps maximize space.

PATENTED WATERSENSE TECHNOLOGY

Our adaptive purge control automatically reduces scale buildup by adjusting to your facility's water quality, resulting in more sanitary ice and even extended time between cleanings.

PATENTED HARVEST ASSIST

Our exclusive system uses a minimal amount of hot gas and a unique probe to push cube ice into the bin, ensuring a consistently available supply.

VARI-SMART™ ICE LEVEL CONTROL (optional)

This optional water- and energy-saving feature enables you to customize ice levels, ensuring customers get the ice they need.

ENERGY STAR-QUALIFIED MODELS

Hydrate HQ continues to offer a wide assortment of models that are ENERGY STAR-certified, saving you water and energy.

Created to help you make, store and serve ice smarter.

Developed and optimized to provide the lowest total cost of ownership.

The clear choice.

- A leading brand trusted by many of the world's largest QSR, convenience store, hospitality and restaurant chains.
- Proudly manufactured in our award-winning Fairfax, SC facility.
